Subject Index of Volume 36

Activation studies
  fabrication and activation studies of conducting plastic composite electrodes for redox cells, 29
Alkaline fuel cells
  oxygen electrodes for rechargeable alkaline fuel cells, 323
  pyrolyzed macrocycles on high surface area carbons for reduction of oxygen in alkaline fuel cells, 547
Alloy
  analysis of conditions that promote passivation on Ca–alloy grids in lead/acid batteries, 451
Aluminum
  experimental studies of transition metal chloride electrodes in undivided cells using molten $NaAlCl_4$ electrolyte, 537
  pulse power characteristics of poly(3-methylthiophene) cathodes in $Li(SO_2)_2AlCl_4$ electrolyte, 175
Anode
  performance of dual anode Ni–H_2 cell, 363
Antimony
  premature capacity loss in lead/acid batteries; Sb-free effect and related phenomena, 567
Arsenic
  Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561

Battery research
  Na–metal chloride battery research at JPL, 385
Bismuth
  effect of Bi on corrosion behaviour of Pb in sulphuric acid, 57

Calcium
  analysis of conditions that promote passivation on Ca–alloy grids in lead/acid batteries, 451
Capacitor
  new solid-state electric double-layer capacitor using poly(vinyl alcohol)-based polymer solid electrolyte, 87
  solid-ionomer electrochemical capacitor, 341
Capacity loss
  premature capacity loss in lead/acid batteries; Sb-free effect and related phenomena, 567
Carbon dioxide
  Au cathode in system Li_2CO_3–CO_2–CO at 800 to 900 °C, 205
Cathode(s)
  Au cathode in system Li_2CO_3–CO_2–CO at 800 to 900 °C, 205
  influence of macrocyclic compounds on electrochemical reduction of thionyl chloride at glassy carbon cathodes, 127
  Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561
  overcharge protection of MnO_2 cathodes, 45
  pulse power characteristics of poly(3-methylthiophene) cathodes in $Li(SO_2)_3AlCl_4$ electrolyte, 175
Cobalt
  electrochemical behaviour of α-cobalted Ni hydroxide electrodes, 497
  IR characterization of turbostratic α- and well crystallized α^*-cobalted Ni hydroxides, 113
Cobalt hydroxide
  cyclic voltammetric studies of pure and doped films of Co hydroxide in 1 M KOH, 507
Common pressure vessel
  multiple CPV Ni–H_2 battery, 375
Computer aided design
  of bipolar lead/acid battery, 155
Computer simulation
  of thermal modelling of alkaline hydrogen/oxygen fuel cells, 185
Corrosion behaviour
  effect of Bi on corrosion behaviour of Pb in sulphuric acid, 57

Elsevier Sequoia, Lausanne

Current-conducting components
new materials for current-conducting components in lead/acid batteries, 473
Cyclability
effects of physical constraints on Li cyclability, 517
Cyclic voltammetric studies
of pure and doped films of Co hydroxide in 1 M KOH, 507

Dimethyl carbonate
Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561

Electric double-layer capacitor
new solid-state electric double-layer capacitor using poly(vinyl alcohol)-based polymer solid electrolyte, 87
Electrochemical behaviour
of α-cobalted Ni hydroxide electrodes, 497
Electrochemical capacitor
solid-ionomer electrochemical capacitor, 341
Electrochemical oxidation
of methanol on Pt in phosphoric acid solution, 11
Electrochemical reduction
influence of macrocyclic compounds on electrochemical reduction of thionyl chloride at glassy carbon cathodes, 127
Electrode(s)
behaviour of Fe polythiophene positive electrodes in Li cells, 557
effects of Pt on Ni electrodes in Ni–H_2 cell, 253
electrochemical behaviour of α-cobalted Ni hydroxide electrodes, 497
experimental device for investigations of formation process of $Ni(OH)_2$/NiOOH electrode, 167
experimental studies of transition metal chloride electrodes in undivided cells using molten $NaAlCl_4$ electrolyte, 537
fabrication and activation studies of conducting plastic composite electrodes for redox cells, 29
impedances of Ni electrodes cycled in various KOH concentrations, 285
oxygen electrodes for rechargeable alkaline fuel cells, 323
physicochemical properties and performance characteristics of PbO_2 electrode, 439
Raman spectral observation of 'new phase' observed in Ni electrodes cycled to failure, 279
Electrode kinetics
high energy efficiency and high power density PEM fuel cells; electrode kinetics and mass transport, 299
Electrolyte(s)
experimental studies of transition metal chloride electrodes in undivided cells using molten $NaAlCl_4$ electrolyte, 537
Li batteries utilizing $SOCl_2$–SO_2Cl_2 mixed electrolytes, 1
Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561
new solid-state electric double-layer capacitor using poly(vinyl alcohol)-based polymer solid electrolyte, 87
pulse power characteristics of poly(3-methylthiophene) cathodes in $Li(SO_2)_3AlCl_4$ electrolyte, 175
Electrolyte management
of molten-carbonate fuel cells, 529
Electrolyte solutions
ion solvation in Li battery electrolyte solutions; solvent effects on Li ion intercalation in Nb triselenide, 17
Energy efficiency
high energy efficiency and high power density PEM fuel cells; electrode kinetics and mass transport, 299

Fabrication
and activation studies of conducting plastic composite electrodes for redox cells, 29
Failure modes
failure modes of lead/acid batteries, 415
Formation process
experimental device for investigations of formation process of $Ni(OH)_2$/NiOOH electrode, 167

Gold
Au cathode in system Li_2CO_3–CO_2–CO at 800 to 900 °C, 205

Hydrogen
effects of Pt on Ni electrodes in Ni–H_2 cell, 253
performance of dual anode Ni–H_2 cell, 363
physical and chemical analysis of Ni–H_2 cell, 269
multiple cell common pressure vessel (CPV) Ni–H_2 battery, 375
Hydrogen/oxygen fuel cells
computer simulation of thermal modelling of alkaline hydrogen/oxygen fuel cells, 185
Hydrothermal curing
of lead/acid battery positive plates, 95

Impedances
of Ni electrodes cycled in various KOH concentrations, 285
Infrared characterization
of turbostratic α- and well crystallized α^*-cobalted Ni hydroxides, 113
Ion solvation
in Li battery electrolyte solutions; solvent effects on Li ion intercalation in Nb triselenide, 17
Iron polythiophene
behaviour of Fe polythiophene positive electrodes in Li cells, 557

Jet Propulsion Laboratory
Na–metal chloride battery research at JPL, 385

Lead
effect of Bi on corrosion behaviour of Pb in sulphuric acid, 57
Lead/acid battery(ies)
analysis of conditions that promote passivation on Ca–alloy grids in lead/acid batteries, 451
computer aided design of bipolar lead/acid battery, 155
failure modes of lead/acid batteries, 415
hydrothermal curing of lead/acid battery positive plates, 95
new materials for current-conducting components in lead/acid batteries, 473
premature capacity loss in lead/acid batteries; Sb-free effect and related phenomena, 567
technological progress in sealed lead/acid batteries, 479
Lead/acid battery technology
modern lead/acid battery technology; new materials, 461
Lead/acid system
UNESCO expert workshop; theory and practice of lead/acid system, Gaussig, F.R.G., Apr. 2–5, 1991, 405
Lead dioxide electrode
physicochemical properties and performance characteristics of PbO_2 electrode, 439
Lithium
advances in Li–TiS_2 cell technology, 395
Au cathode in system Li_2CO_3–CO_2–CO at 800 to 900 °C, 205
behaviour of Fe polythiophene positive electrodes in Li cells, 557
Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561
pulse power characteristics of poly(3-methylthiophene) cathodes in $Li(SO_2)_3AlCl_4$ electrolyte, 175
Lithium battery(ies)
ion solvation in Li battery electrolyte solutions; solvent effects on Li ion intercalation in Nb triselenide, 17
Li batteries utilizing $SOCl_2$–SO_2Cl_2 mixed electrolytes, 1
Lithium cyclability
effects of physical constraints on Li cyclability, 517
Lithium ion intercalation
solvent effects on Li ion intercalation in Nb triselenide; Li battery electrolyte solutions, 17

Macrocyclic compounds
influence of macrocyclic compounds on electrochemical reduction of thionyl chloride at glassy carbon cathodes, 127
Manganese dioxide
overcharge protection of MnO_2 cathodes, 45
Mass transport
high energy efficiency and high power density PEM fuel cells; electrode kinetics and mass transport, 299

Metal chloride
Na–metal chloride battery research at JPL, 385
Methanol
electrochemical oxidation of methanol on Pt in phosphoric acid solution, 11
Mission from Planet Earth
SPE® water electrolyzers in support of Mission from Planet Earth, 219
Molten-carbonate fuel cells
effect of operating temperature on performance of MCFCs, 69
electrolyte management of MCFCs, 529

Nickel
effects of Pt on Ni electrodes in Ni–H_2 cell, 253
experimental device for investigations of formation process of $Ni(OH)_2$/NiOOH electrode, 167
impedances of Ni electrodes cycled in various KOH concentrations, 285
multiple cell common pressure vessel Ni–H_2 battery, 375
performance of dual anode Ni–H_2 cell, 363
physical and chemical analysis of Ni–H_2 cell, 269
Raman spectral observation of 'new phase' observed in Ni electrodes cycled to failure, 279
Nickel hydroxide
electrochemical behaviour of α-cobalted Ni hydroxide electrodes, 497
IR characterization of turbostratic α- and well crystallized α^*-cobalted Ni hydroxides, 113
Niobium triselenide
solvent effects on Li ion intercalation in Nb triselenide; Li battery electrolyte solutions, 17

Overcharge protection
of MnO_2 cathodes, 45
Oxygen
computer simulation of thermal modelling of alkaline hydrogen/oxygen fuel cells, 185
pyrolyzed macrocycles on high surface area carbons for reduction of oxygen in alkaline fuel cells, 547
Oxygen electrodes
for rechargeable alkaline fuel cells, 323

Passivation
analysis of conditions that promote passivation on Ca–alloy grids in lead/acid batteries, 451
Performance characteristics
physicochemical properties and performance characteristics of PbO_2 electrode, 439
Phosphoric acid
electrochemical oxidation of methanol on Pt in phosphoric acid solution, 11
Phosphoric acid fuel cell assemblies
physical and chemical state of phosphoric acid fuel cell assemblies after long term operation; surface and near-surface analysis, 137
Physical and chemical analysis
of Ni–H_2 cell, 269
Physical and chemical state
of phosphoric acid fuel cell assemblies after long term operation; surface and near-surface analysis, 137
Physical constraints
effects of physical constraints on Li cyclability, 517
Physicochemical properties
and performance characteristics of PbO_2 electrode, 439
Plastic composite electrodes
fabrication and activation studies of conducting plastic composite electrodes for redox cells, 29
Platinum
effects of Pt on Ni electrodes in Ni–H_2 cell, 253
electrochemical oxidation of methanol on Pt in phosphoric acid solution, 11
Poly(3-methylthiophene)
Li rechargeable cell with poly 3-methylthiophene cathode and $LiAsF_6$–dimethyl carbonate electrolyte, 561
pulse power characteristics of poly(3-methylthiophene) cathodes in $Li(SO_2)_3AlCl_4$ electrolyte, 175
Poly(vinyl alcohol)
new solid-state electric double-layer capacitor using poly(vinyl alcohol)-based polymer solid electrolyte, 87
Positive plates
hydrothermal curing of lead/acid battery positive plates, 95

Power density
high energy efficiency and high power density PEM fuel cells; electrode kinetics and mass transport, 299
Proton exchange membrane fuel cells
high energy efficiency and high power density PEM fuel cells; electrode kinetics and mass transport, 299
Pulse power characteristics
of poly(3-methylthiophene) cathodes in $Li(SO_2)_3AlCl_4$ electrolyte, 175
Pyrolyzed macrocycles
on high surface area carbons for reduction of oxygen in alkaline fuel cells, 547

Raman spectral observation
of 'new phase' observed in Ni electrodes cycled to failure, 279
Rechargeable alkaline fuel cells
oxygen electrodes for rechargeable alkaline fuel cells, 323
Redox cells
fabrication and activation studies of conducting plastic composite electrodes for redox cells, 29

Sodium
experimental studies of transition metal chloride electrodes in undivided cells using molten $NaAlCl_4$ electrolyte, 537
Na–metal chloride battery research at JPL, 385
Solvent effects
on Li ion intercalation in Nb triselenide; Li battery electrolyte solutions, 17
Space station
space water electrolysis; space station through advanced missions, 235
Space water electrolysis
space station through advanced missions, 235
SPE® water electrolyzers
in support of Mission from Planet Earth, 219
Sulfur
Li batteries utilizing $SOCl_2$–SO_2Cl_2 mixed electrolytes, 1
Sulfuric acid
effect of Bi on corrosion behaviour of Pb in sulphuric acid, 57

Technological progress
in sealed lead/acid batteries, 479
Temperature
effect of operating temperature on performance of molten-carbonate fuel cells, 69
Thermal battery
optimization of externally heated thermal battery, 7
Thermal modelling
computer simulation of thermal modelling of alkaline hydrogen/oxygen fuel cells, 185
Thionyl chloride
influence of macrocyclic compounds on electrochemical reduction of thionyl chloride at glassy carbon cathodes, 127
Titanium
advances in Li–TiS_2 cell technology, 395
Transition metal chloride electrodes
experimental studies of transition metal chloride electrodes in undivided cells using molten $NaAlCl_4$ electrolyte, 537

Water electrolysis
space water electrolysis; space station through advanced missions, 235
Water electrolyzers
SPE® water electrolyzers in support of Mission from Planet Earth, 219
